

Monday

① Find the area.

② Simplify. Show your work.

$$14 + 4(2x + 7)$$

③ Evaluate the expression when $a = 4$

$$\frac{3a}{6}$$

① Find the area.

Square:

Triangle:

Rectangle:

Triangle:

② Factor the expression

$$5x - 35$$

③ Which expression is equal to:

$$g + g + g$$

(A) g^3

(B) $g + 3$

(C) $3g$

(D) $3 + 3 + 3$

Tuesday

Wednesday

① Find the area.

Parallelogram:

② Simplify. Show your work.

$$2^2 \cdot 3^2 - 6 \cdot 2$$

Triangle:

③ Order from least to greatest.

$$2, -9, 7, -20, -3 \longrightarrow$$

$$-12, -8, 3, 0, -36 \longrightarrow$$

① Find the area.

Parallelogram:

② Graph and label the polygon: $(-4, 5), (-8, 3), (-4, -2), (-8, -4)$

③ Graph and label the polygon: $(1, 1), (9, 1), (9, 5), (5, 9), (1, 5)$

Triangle:
