## Daily Bellwork - Math Review Week 22 (pg. 44)

(1) Add parentheses to make true.
$9-3 \cdot 7+21 \div 3=49$
$5-3 \cdot 3^{2}+2=20$
(2) $0.5 \%$ of 60
(3) Solve. Show your work.
$3.3+0.8+112=1.9827-0.34=$

Identify if the question is statistical or non statistical.
"How much time to 6 th grade
students typically spend on homework each night?"
(2) You jogged II killometers at an average speed of 10 kilometers per hour. How long did you jog?
$\qquad$ hours $\qquad$ minutes
(3) Barne's Book Store was selling 4 books for $\$ 21.80$. A website was selling 6 books for $\$ 32.16$. Which place has a lower unit price?

## Daily Bellwork - Math Review Week 22 (pg. 45)

(1) Which expression is equal to:
$(8+2 b) \cdot c$
(A) $2(4+b) \cdot c$
(B) $8 c+(2 b \cdot c)$
(C) $(b+c) \cdot 8$
(D) $8 \cdot 2 \mathrm{~b} \cdot \mathrm{c}$
(2) Use an integer to describe the situations.

78 degrees above 0 $\qquad$
200 degrees below 0 $\qquad$
(3) Write an expression to represent:
"Nine fewer than 8 times a number"
(1) The muffin batter contains 2 cups of flour, 1 cup of milk, one half cup of sugar, and 3 eggs. What is the ratio of flour to milk? What is the ratio of sugar to flour?
(2) A rectangular prism has a volume of 864 cubic centimeters. The prism is 9 centimeters tall and 12 centimeters long. How wide is the prism?
(3) Science test scores (\%):
$83,97,85,84,96,80,80,87,91$
mean $=$ $\qquad$ median $=$ $\qquad$
$\operatorname{mode}(s)=$ $\qquad$ range = $\qquad$
